ZHEJIANG AOKI MEDICAL DRESSING CO., LTD

CE₀₁₉₇ FDA ISO13485

Established in 2009 and located in Chinese youngest newborn city Longgang, Zhejiang Aoki Medical Dressing Co.,Ltd is a professional medical consumable supplier which integrate manufacture, sales and research together. Aoki has over 50,000 square meter of ecological garden plant and set up an independently research and development center in Shanghai. With advanced production machine, sterilization equipment and rigorous process technology, Aoki achieve the whole industrial chain cover from production, sterilization and testing.

As a national high technology enterprise, science and technology of Zhejiang Province. Aoki has developed rapidly in the past years by the abundant strength, high quality products and impeccable service system. Involved in three main area, medical, beauty and daily life, Aoki has more than 1000 products category which approved with CE, FDA and ISO13485. By the efforts of the R&D team, Aoki has several patent of invention and utility models.

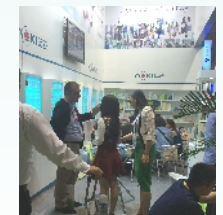

Aoki will take full advantage of itself to build a new modern plant including well-equipped facilities, reasonable support facilities and thorough function. In order to achieve the goal of world brand based in China in medical dressing industry, Aoki will keep technology, equipment, service and management innovation to satisfy the need in future development of medical dressings.

Basic Structure

Type A: PU film, medical adhesive, release paper(film)

Features

Transparent dressing adopts a new type of dressing which is ultra-thin and comfortable. It is a special semi-permeable membrane with waterproof, breathable, hypoallergic, transparent and elastic. It is widely used in veins and arterial catheters fixation and devices fixation. It can be also used to cover and protect skin damage and provide wound care. It is a necessary product for skin beauty, family standing medicine boxes, military training exercises, wartime first aid, and factory construction.

*Can Be Customized According To Customer Requirements

Characteristics

- Good absorbency for exudation from the wound.
- Keep the wound moist and accelerate the wound healing; reduce the pain and avoid the secondary damage to the wound.
- Waterproof, permeable and prevent the wound from bacteria outside.
- Excellent elasticity and self-adhesive, easy for application.
- Change the dressing when it turns white.
- Easy for peeling off and it will not stick to the wound and keep patients comfortable.

Features:

- Suitable for disinfection of the human skin or objects .
- Using Multiple EDI purified water reverse osmosis filtration technology: no impurities.
- Quickly volatilize after wiping, safety in use.
- No artificial flavors, fluorescent agents, preservatives added.
- Spunlace non-woven fabric material: delicate and soft, no remained fibers, not easy to fluff.
- Individual packaging: good leakproofness, easy to carry.
